

Science Center to Go

— visualising the invisible

www.sctg.eu

In the Science Center to Go (SceTGo) project science centers are brought to schools. We have constructed miniatures from the exhibits of science centers. These miniatures, which have been packed in a suitcase, are easy to take to the schools.

At present, by the miniatures it is possible to learn wing dynamics, light's behavior in double-slit experiment, double cone phenomenon, doppler effect and movement of molecules.

— learning with miniatures
